Database Weekly

Issue 188 — January 26, 2018

It's About Time For Time Series Databases — “Nobody wants to have large grain snapshots of data for any dataset that is actually comprised of a continuous stream of data.”

TIMOTHY PRICKETT MORGAN

UnQLite: An Embeddable NoSQL Database Engine — An old project that has just been ‘revived’ with fresh development. Like SQLite, it reads and writes directly to normal files on disk and is embeddable/‘in-process’.

SYMISC SYSTEMS [TOOLS](#)

LinkedIn's Gobblin: A Framework for 'Gobbling' Big Data with Ease — Interview with LinkedIn's Abhishek Tiwari about [Gobblin](#), an open source data ingestion framework being incubated at Apache.

MICHELLE GIENOW

MySQL Client for iPhone & iPad — SQLPro for MySQL, one of the leading macOS database clients has been released for iOS. Features include autocomplete, multiple query execution, editable results and more.

HANKINSOFT DEVELOPMENT [SPONSORED](#)

Practical Tradeoffs in Google Cloud Spanner, Azure Cosmos DB and YugaByte DB — A deep dive into the consistency-availability tradeoff imposed by CAP which is only applicable during failure conditions.

SID CHOUDHURY

An Update on Redis Streams Development — The next major version of the popular data structure server should include [streams](#) as a new primitive type.

SALVATORE SANFILIPPO

Is Data Warehousing Dead? — Things aren't what they used to be if you identify as a data warehouse engineer. We make the same decisions today, but the technology and scale has changed.

TAMIR ROZENBERG

Migrating MySQL to Postgres with Minimal Downtime — Looking to migrate from MySQL to Postgres and minimize your downtime? [pg_chameleon](#) is a tool that can help by replicating from MySQL to Postgres.
