#203 — MAY 11, 2018

[READ ON THE WEB](#)

Database Weekly

[SQLite to Gain 'UPSERT' Functionality](#) — A draft of how SQLite will introduce support for allowing INSERTs to turn into updates if the INSERT would violate a uniqueness constraint (essentially 'update or insert').
SQLITE

[Amazon Aurora Backtrack: Turn Back Time in Aurora](#) — AWS's high performance MySQL and PostgreSQL compatible database gains an 'undo' feature that lets you 'rewind' your database by a certain number of hours (up to 72).
JEFF BARR

[Using MySQL for Distributed Database Architectures](#) — See how you can use MySQL to engineer distributed multi-node systems in this 45 min webinar with Percona, CEO, Peter Zaitsev.
PERCONA SPONSOR

[Avoiding 'OR' for Better Query Performance](#) — A look at different kinds of queries using SQL's OR and how to rewrite them without OR for better performance.
LAURENZALBE

[RadonDB: A MySQL-Compatible Fully Distributed Cloud Database](#) — A new open source, cloud-native database that supports distributed transactions and automatic table sharding.
RADONDB

[Cloud Memorystore: A Fully Managed In-Memory Data Store Service for Redis](#) — Google has made a public beta of a highly available, fully-managed Redis 3.2.11-compatible service available. It supports instances of up to 300GB.
GOOGLE CLOUD PLATFORM

[Self-Driving Databases are Coming: What Next for DBAs?](#) — What do 'autonomous databases' that self repair, patch, back up, and optimize themselves mean for DBAs in the future?
MARIACOLGAN (ORACLE)

[It's The Future \(for Databases\)](#) — What does the future hold for databases? It may or may not have something to do with Postgres.
CRAIG KERSTIENS

[MySQL 8.0: InnoDB Now Supports Instant ADD COLUMN](#)
MYSQL SERVER TEAM

[Free Whitepaper: MySQL on Docker](#) — Learn how to containerize your MySQL database.
SEVERALNINES SPONSOR

[All You Need to Know About MongoDB on Google Cloud](#)
RAJU DAWADI

[Continuously Deploying Elasticsearch on Kubernetes](#)
YANN SIMON

[Improving Response Latency in Elasticsearch with Adaptive Replica Selection](#)

LEE HINMAN

[Lucidchart's Database Migration to Amazon Aurora](#) — [Aurora](#) is AWS's MySQL and PostgreSQL compatible relational database service.

LUCIDCHART

[Khan Academy's New Data Pipeline Management Platform Explained](#)

RAGINI GUPTA

► [A Technical Overview of Azure Cosmos DB](#) — How to get started building 'planet-scale' apps with Azure Cosmos DB, Microsoft's multi-model database.

ANDREW LIU AND RAMKRISHNAMURTHY

[Six Reasons Why Enterprises Need a Modern Data Integration Architecture](#)

DATANAMI

[Email Course: Introduction to Change Streams in MongoDB](#)

MONGODB SPONSOR

[csvs-to-sqlite: Convert CSV Files Into a SQLite Database](#) — A tool written in Python.

SIMON WILLISON TOOLS

[go-mysql-elasticsearch: Sync MySQL Data into Elasticsearch](#)

LIU TANG TOOLS
