#198 — APRIL 6, 2018

[READ ON THE WEB](#)

Database Weekly

[CockroachDB 2.0 Released](#) — CockroachDB is an open source, distributed SQL database. 2.0 brings support for 'semi-structured' data via JSON, as well as increased throughput and lower latency on TPC-C. GDPR compliance tools have [also been added](#).

NATE STEWART

[A Browser-Based MongoDB Playground](#) — Inspired by similar 'playgrounds' for [Golang](#) or [JavaScript](#), this page lets you play with a MongoDB database from your browser. It's [open source](#) if you want to run your own instance (internally, say).

ADRIEN PETEL

[Introduction to InfluxDB and TICK Stack](#) — Learn how to get up and running with the fastest growing open source TSDB (time-series database).

INFLUXDATA SPONSOR

[Give Meaning to 100 Billion Analytics Events a Day](#) — A case study of using Kafka, Dataflow and BigQuery to ingest and transform a large stream of events.

ALBAN PERILLAT-MERCEROZ

[Using Neo4j-GraphQL to Serve a GraphQL Endpoint Directly from Neo4j](#) — Turn the popular [Neo4j](#) graph database into a GraphQL server.

WILLIAMLYON

[Dynamize: Speeding up MySQL with CPU Performance Virtualization?](#) — Currently in beta, [this page](#) goes into depth on how it works and what it does. An intriguing concept.

DYNAMIZE, INC.

[Postgres Vision: Join Us in Boston, June 5 & 6](#) — Deploying Postgres in the cloud, the changing role of the DBA, moving Oracle workloads to the cloud, and more.

POSTGRES VISION 2018 SPONSOR

[ETL vs ELT: Considering the Advancement of Data Warehouses](#) — *"With the advent of modern cloud-based data warehouses, such as BigQuery or Redshift, the traditional concept of ETL is changing towards ELT – when you're running transformations right in the data warehouse."*

ARTYOMKEYDUNOV

[Hit The Ground Running with Vue.js and Firestore](#) — Firestore is a new data storage approach from Google Firebase.

LUKAS VAN DRIEL

[Behind on Preparing for GDPR? 3 Things to Prioritize](#) — The May 25, 2018 GDPR deadline is quickly approaching and has major data usage implications if you're in the EU or do business there.

MIKAJAVANAINEN

[Anna: A KVS for Any Scale](#) — We featured Anna [a month ago](#) but this reflects further on its implementation.

ADRIAN COLYER

[Improving HBase Backup Efficiency at Pinterest](#)

LIANGHONG XU

[MongoDB 4.0 Will Support Multi-Document, ACID Transactions](#)

MONGODB SPONSOR

[MapD Cloud: A New GPU-Accelerated Analytics Platform](#)

TODD MOSTAK

[New Annotated Config Files for Postgres 10](#) — Understand PostgreSQL's config files better with resources including [a CSV file](#) covering *all 269 postgresql.conf settings*.

JOSH BERKUS

[Introducing the Google Analytics Sample Dataset for BigQuery](#) — A dataset for gaining experience with analyzing analytics data with BigQuery.
