DB Weekly

Database Weekly

Issue 118 — August 19, 2016

FEATURED

NoSQL Databases: A Survey and Decision Guidance — An incredibly thorough overview of the NoSQL landscape.
FELIX GESSERT

Using State Machines to Run Databases — Want a look at how a large as-a-service offering provides databases at scale? This gives you a look. The key under the covers is a state machine, used by both Citus and Heroku.
CITUS DATA

10 Transformational Database Technologies — A piece from Oracle referencing in-memory databases, JSON, containers, and the cloud as major transformational influences on modern database systems.
CHRIS MURPHY

Itching for a rewrite? Try a Code Inspection™ from Corgibytes first — We know the frustration. You see all the places your app could be so much better, but you can't seem to convince your boss. Next time, mention Corgibytes. Our Code Inspection™ can help you explain technical improvements in a way executives can understand.
CORGIBYTES SPONSORED

Identity Crisis Threatens to Sideline Hadoop As The Leader of Big Data — The rapid proliferation of Big Data software has made it less certain what Hadoop stands for today.
GEORGE GILBERT

Advancing Enterprise Database Workloads On Google Cloud Platform — Google's cloud database storage products (Cloud SQL, Cloud Bigtable and Cloud Datastore) are now out of beta and ready for production use.
DOMINIC PREUSS

Context Aware MySQL Pools via HAProxy — Creating a self-managing topology that excludes lagging replicas automatically, handles disasters gracefully, and still allows for complete human control and visibility.
SHLOMI NOACH CODE

The SQL Service At The Heart of Amazon Kinesis Analytics — AWS gave real-time app developers a boost recently when it unveiled Amazon Kinesis Analytics, a new service for continuously querying streaming data using SQL.
ALEX WOODIE

JOBS
